Software Engineer | Full Stack Developer

Upon earning my degree from The University of Scranton with a degree in business management, I worked in operations and project management for real estate start-ups. During that time I developed a keen interest in resolving business issues I encountered. Subsequently, I enrolled in the Flatiron School completed the software engineering course, and earned my full-stack certificate. There I gained a foundation in technical skills and now I am seeking a position that leverages those skills to meet end-user requirements.

Technical Skills

- **Languages:** Python, JavaScript, HTML, CSS, Swift
- **Frameworks:** React, Flask, SQL
- **Tools:** Xcode, Core Data, Git, VScode, Figma

Technical Projects (Flatiron Curriculum)

GroceryGenius - Swift-based grocery management app

- Integrated OpenAI API for recipe suggestions based on user groceries.
- Created Core Data models for grocery items with manual expiration tracking.
- Developed a calendar feature to visualize and alert users of upcoming expiration dates.

Tankzzz - Galactica-inspired tank game, Python/Pygame

- Implemented dynamic sprite-based gameplay with tank navigation and battles.
- Designed health and scoring systems, utilizing custom sprites and animations.
- Integrated high-score tracking for player engagement.

BookVault - React-based book collection manager

- Coded a user-friendly interface to add, edit, and delete books.
- Managed state and controlled forms to handle user inputs and update book lists.
- Leveraged React components to dynamically display and update book details.

Experience

Urban Furnished - Project Manager

2021 - 2022

Collaborated with C-level executives to implement strategic business initiatives, leading a team of 5 interns on UX/UI design and operational projects. Managed the online presence of 250 luxury units, optimizing digital marketing efforts to enhance efficiency and brand visibility.

Blueground - Operations Specialist

2020 - 2021

Analyzed monthly KPIs and collaborated with management to establish performance targets. Improved website functionality by removing inconsistent data, enhancing user experience, and revising hundreds of property pages to clarify property descriptions.

Education

Flatiron School

Software Engineering, Full Stack Development

06/2024 - 09/2024

The University of Scranton

Bachelor of Science, Business Management

06/2020
